

IT SECURITY GOVERNANCE & MANAGEMENT DIAGNOSTIC

Thinking your organisation is sufficiently protected against security threats isn't good enough.

Only 54% of businesses and **41% of charities** carried out risk management and cybersecurity assurance activities in the last 12 months.

Source: UK Gov DCMS Cyber Security Breaches Survey 2022

Our diagnostics collect data from your team and stakeholders to provide in-depth analysis of your organisation's cybersecurity resilience. This allows you to effectively assess and accelerate your organisation's cybersecurity maturity.

For IT leaders with limited security budget, our diagnostics will provide data about your operations, together with clear recommendations, enabling you to spend your budget where it will have most impact.

Run our IT Security Governance & Management Diagnostic to evaluate your:

- Security culture
- Auditing
- Compliance management
- Policy and process governance
- Event and incident management
- Risk analysis
- Vulnerability management
- IAM (Identity Access Management)

Get ahead of the cyber threats and boost your security maturity!
